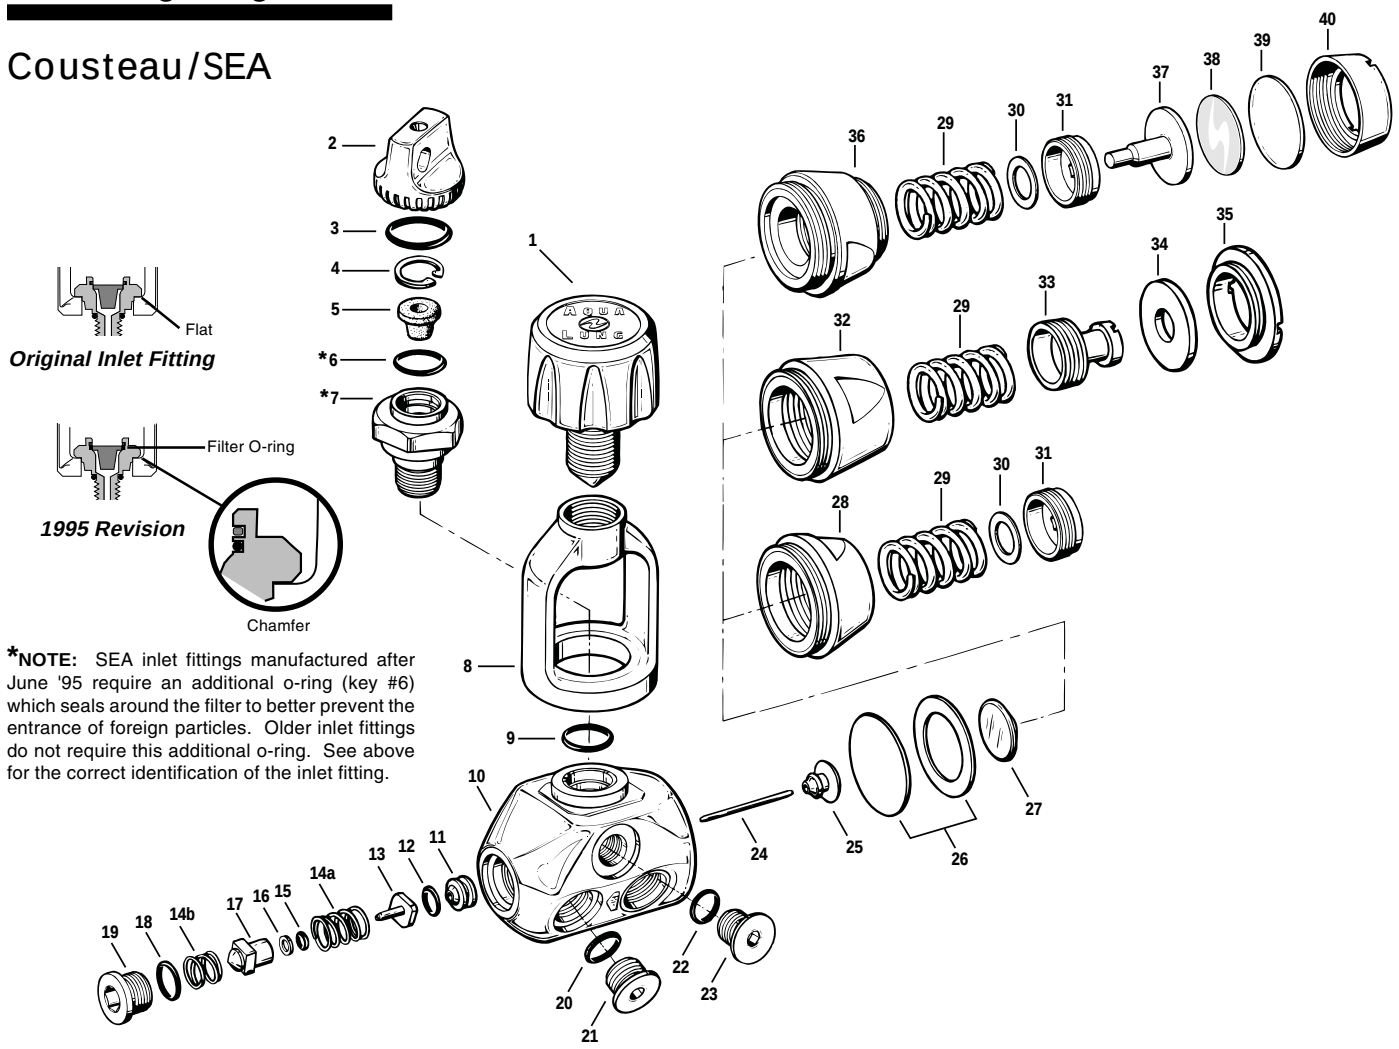
First-Stage Regulators

Cousteau/SEA



***NOTE:** SEA inlet fittings manufactured after June '95 require an additional o-ring (key #6) which seals around the filter to better prevent the entrance of foreign particles. Older inlet fittings do not require this additional o-ring. See above for the correct identification of the inlet fitting.

COMMUNICATIONS & DRYSUITS

Gates Dry Suits and Accessories

In June 2000, Aqua Lung elected to exit the dry suit market in the United States. As you may recall, Aqua Lung was the proud distributor of the Gates Rubber Company line of suits and accessories for several years.

While we have eliminated our entire inventory of dry suits and spare parts, Aqua Lung and Gates have worked together to formulate an exit strategy that would provide minimal disruption to the distribution stream of spares. Below you will find a list of the newly appointed distributors as well as the authorized repair and warranty centers. Please contact them directly with your needs.
